

AI Delivery / Project Manager

Keep enterprise AI delivery on time, on scope, and secured.

LOCATION

Remote (global)

TYPE

Full-time

About Flaredog

Flaredog takes enterprise AI from idea to secured production, end to end. Alongside our delivery work we build a product portfolio that turns recurring enterprise pain into software: DuraGraph, Finsightly, Tradoing, and UpstackLab. We are founder-led, early-stage, and expanding across Asia.

The role

You run the delivery side of Flaredog engagements: timelines, scope, risk, and communication with the customer. You work between sales, engineering, and the customer to make sure what gets promised gets shipped. You report to the Head of Delivery.

What you will do

- Plan and run delivery timelines across multiple concurrent engagements.
- Manage scope and flag risk early, to both the customer and internal team.
- Coordinate engineering, security, and the customer through go-live.
- Keep delivery documentation and status current and honest.

What you bring

- 3+ years managing technical delivery or projects for enterprise customers.
- Comfort managing multiple engagements with competing deadlines.
- Enough technical fluency to hold engineers and customers to account.
- Clear written and spoken communication with enterprise stakeholders.

Nice to have

- Experience delivering AI, data, or infrastructure projects.
- PMP, Agile, or similar project management background.
- Experience working through systems integrators or in regulated industries.

What we offer

- Fully remote. Work from anywhere in your timezone.

- Real ownership of your area from day one.
- A small, senior team and direct founder access.
- Async-first, low-meeting culture.

How to apply
