

Solutions / Delivery Engineer

Turn a signed deal into secured AI running in production.

LOCATION

Remote (global)

TYPE

Full-time

About Flaredog

Flaredog takes enterprise AI from idea to secured production, end to end. Alongside our delivery work we build a product portfolio that turns recurring enterprise pain into software: DuraGraph, Finsightly, Tradoing, and UpstackLab. We are founder-led, early-stage, and expanding across Asia.

The role

You lead technical delivery for Flaredog engagements: scoping, building, and shipping enterprise AI into production. You work directly with customers and internal teams to make sure what we sell is what we deliver, on time and secured. You report to the Head of Delivery.

What you will do

- Scope and build the technical solution for each customer engagement.
- Own delivery timelines and communicate status honestly to customers.
- Harden delivered systems for security, reliability, and enterprise requirements.
- Work with sales during scoping to keep commitments realistic.

What you bring

- 3+ years delivering technical projects for enterprise customers.
- Strong backend or full-stack engineering skills you can apply directly.
- Comfort owning a delivery end to end, including the hard conversations.
- Clear written and spoken communication with customers.

Nice to have

- Experience delivering AI or data infrastructure projects.
- Experience working through systems integrators or in regulated industries.
- Consulting or professional services background.

What we offer

- Fully remote. Work from anywhere in your timezone.

- Real ownership of your area from day one.
- A small, senior team and direct founder access.
- Async-first, low-meeting culture.

How to apply

Apply at <https://flaredog.com/careers/solutions-engineer>. We post shortlist updates on LinkedIn, follow Flaredog so you catch yours: <https://www.linkedin.com/company/flaredog/>. Want to move faster? DM us on LinkedIn, mention the role, and introduce yourself.
