

Technical Writer

Make complex systems clear, in writing that engineers respect.

LOCATION

Remote (global)

TYPE

Full-time

About Flaredog

Flaredog takes enterprise AI from idea to secured production, end to end. Alongside our delivery work we build a product portfolio that turns recurring enterprise pain into software: DuraGraph, Finsightly, Tradoing, and UpstackLab. We are founder-led, early-stage, and expanding across Asia.

The role

You write documentation, guides, and technical content that make our products and infrastructure understandable. You work with engineers to get details right, and with the Growth Lead on where technical writing supports content and sales. Precision matters more than polish.

What you will do

- Write and maintain product documentation and technical guides.
- Work directly with engineers to verify accuracy before publishing.
- Turn technical depth into content that supports growth and sales.
- Keep documentation current as products change.

What you bring

- Strong technical writing, with a portfolio of documentation or technical articles.
- Comfort reading code or technical specs well enough to write about them accurately.
- Precision: you check facts before you publish them.
- Clear, plain English, with no unnecessary jargon.

Nice to have

- A background in software engineering or a related technical field.
- Experience with API documentation or developer-facing content.
- Experience writing for finance or regulated industries.

What we offer

- Fully remote. Work from anywhere in your timezone.

- Real ownership of your area from day one.
- A small, senior team and direct founder access.
- Async-first, low-meeting culture.

How to apply
